

# Innovation Update

## BioFoam™ Bio-Based Polyurethane Foams

The Woodbridge Group is excited to announce **BioFoam** Polyurethane foams to the **ContourTech** Seating Urethane portfolio, formulated from Bio-Polyol. This new innovation is the result of extensive research and development by Woodbridge and Cargill Inc. Woodbridge feels that it is vital to explore new chemical alternatives in order to provide it's customers product options that are derived from renewable resources and offer a strong commitment to the environment.

### Key Benefits

- **BioFoam** has addressed the key issues that have limited it's use in the past such as odour and reactivity
- Woodbridge has integrated this technology into select manufacturing facilities, and in some applications has achieved a substitution rate of up to 25% versus conventional polyols
